PROFESSIONAL PROFILE

A self-driven graduate eager to start a career in Full Stack Development. Proficient in front-end and back-end technologies, including PHP and MySQL. Ready to apply my skills in a dynamic environment and contribute to innovative projects.

EDUCATION

Training - Full Stack Web Development

Accent Techno Soft - 2023

- Underwent training in Full Stack Web Development consisting HTML, CSS, Bootstrap, PHP and MySQL in Apache servers.

Bachelor of Technology

Kongu Engineering College - 2019 to 2023

WORK EXPERIENCE

Accent Techno Soft 2023 - Present

- Engaged in the development of web applications, encompassing both front-end and back-end tasks. This includes designing and implementing user interfaces, optimizing user experience, and handling server-side logic and database management to ensure seamless and efficient application performance.

- Instructing students on the foundational principles of Full Stack Web Development, covering essential topics such as front-end design, back-end programming, server-side scripting, and database management. Providing hands-on guidance to ensure a strong grasp of both theoretical concepts and practical skills.

PROJECTS

**Appointment Management System for
local businesses**

- Developed an appointment management system for local businesses using PHP and MySQL, streamlining scheduling and client interactions. The system features a user-friendly interface for booking, rescheduling, and tracking appointments, enhancing operational efficiency.

**School/College Bus Transport
Management**

- Developed an appointment management system for local businesses using PHP and MySQL, streamlining scheduling and client interactions. The system features a user-friendly interface for booking, rescheduling, and tracking appointments, enhancing operational efficiency.

Virtual Classroom

- Developed an appointment management system for local businesses using PHP and MySQL, streamlining scheduling and client interactions. The system features a user-friendly interface for booking, rescheduling, and tracking appointments, enhancing operational efficiency.

Driving School Management

- Developed an appointment management system for local businesses using PHP and MySQL, streamlining scheduling and client interactions. The system features a user-friendly interface for booking, rescheduling, and tracking appointments, enhancing operational efficiency.

Automatic Birthday and Wedding Wisher

- Developed an appointment management system for local businesses using PHP and MySQL, streamlining scheduling and client interactions. The system features a user-friendly interface for booking, rescheduling, and tracking appointments, enhancing operational efficiency.

Excess Food Donation System

- Created an Excess Food Donation system using PHP and MySQL to facilitate the donation of surplus food from businesses to local charities. The system manages donor and recipient information, schedules pick-ups, and tracks food distribution, ensuring efficient and effective allocation of excess food to those in need.
